tetracycline staining 14, 37, 38
therapeutic fissure sealants 57
three-step bonding systems 114–15, 164
tissue porosity, detection of caries 32
tolonium chloride 81
tooth brushing 51–3
tooth cleaning, PMTC 53
tooth failure 172–3
  causes 172
  failing tooth-restoration complex 175–9
tooth, fractures, classification 36
tooth notations 21–2
  deciduous dentition 21
  FDI, Universal 21
  four quadrants 21
  Palmer notation 21
  two-letter coding system 21
Tooth Slooth® 45
tooth wear (surface loss) 3, 11–13
  aetiology and classification 12
  Basic Erosive Wear Examination 35
  clinical presentation 33–4
  control 57–8
  diagnosis 32–6, 47–8
    verbal history 20, 32–3
  GORD 11, 12
  grading 35–6
  indices 175
  lesions 57–8
  location (buccal, occlusal, incisal) and extent 34
  patient monitoring 175
  process 57
tooth-composite interface 112–14
toothache *see* pain
toothpaste 53
topical remineralization agents 54–5
transitional restorations 53
trauma 13–14
  aetiology 13–14
  clinical detection 36
  cracked cusp/tooth syndrome 42, 45
  diagnosis 48
  fractures, classification 36
  prevention/management 64–5
treatment plan *see* care plan
tweezers, locking 74
two-bottle (total etch, etch and rinse) adhesives 115, 164
two-letter coding system 21

ultrasonics 81
  periodontal scaler 21
Universal tooth notation 21
urethane dimethacrylate resin 110

varnishes 54
veneers
  anterior incisal edge/labial composite 80, 102, 106, 120, 123, 124, 154–7
  old 179
verbal history taking 18–19, 32–3
vision, headlights 22
vitality (sensibility) tests 27–9
Vitapan Classical shade guide tabs 66, 67

water absorption, resin composites 111
water spray 76
white spot lesions 6–7, 23
Whitlockite mineral crystals (β-octocalcium phosphate) 9
written care (treatment) plans 48

xerostomia 3, 24
  Challacome Scale of Oral Dryness 30
xylitol 54

zinc, amalgam 121
zinc oxide-based materials 94, 123
zinc polycarboxylate cements 123
zoning 62–3
