Appendix

Table of Weights and Measurements

Length

1 millimeter (mm)	=	0.001 meter
1 centimeter (cm)	=	0.01 meter
1 yard (yd)	=	0.9144 meter
1 inch (in)	=	2.54 centimeters
1 micrometer (μm)	=	0.001 millimeter
1 micrometer (μm)	=	10,000 Angstrom units
1 Angstrom unit (Å)	=	0.1 nanometer

Weight

1 milligram (mg)	=	0.001 gram
1 gram (gm)	=	0.0022 pound
1 gram (gm)	=	0.035 ounce
1 kilogram (kg)	=	1000 grams
1 ounce (oz)	=	28.35 grams
1 pound (lb)	=	453.59 grams
1 grain	=	0.0645 gram
1 Newton	=	0.2248 pounds (lbs) or 0.102 kg
1 dyne	=	0.00102 gram

Capacity (Liquid)

1 milliliter	=	1 cubic centimeter
1 liter (L)	=	1000 cubic centimeters
1 quart (qt)	=	0.946 liter
1 ounce (oz)	=	29.6 milimeters
1 cubic foot (cu ft)	=	28.32 liters

Conversion Factors (Linear)

	μm	*cm*
1 Angstrom unit (Å)	0.0000001	0.00000001
1 nanometer (nm)	0.000001	0.0000001
1 micrometer (μm)	0.001	0.0001

Conversion Factor (Force per Area)

- To change kilograms per square centimeter (kg/cm^2) to pounds per square inch (lb/in^2), multiply by 14.223 (1 kg/cm^2 = 14.223 lb/in^2).
- To change pounds kilograms per square centimeter (kg/cm^2) to megapascals (Mpa), multiply by 0.0981 (1 kg/cm_2 = 0.0981 MPa). Note 1 MN/m^2 = 1 MPa.
- To chage pounds per square inch (lb/in^2) to kilograms per square centimeter (kg/cm^2), multiply by 0.070307 (1 lb/in = 0.0703 kg/cm^2).
- To chage meganewtons per square meter (MN/m^2) to giganewtons per square meter (GN/m^2), divide by 1000, = 1.273 kg/cm^2 = 18.22 lb/in^2.

From	*To*	*Multiply by*
psi	Mpa (MN/m^2)	0.006895
psi	kg/cm^2	0.0703
kg/cm^2	Mpa (MN/m^2)	0.09807
kg/cm^2	psi	14.2233
MN/m^2	psi	145.0
MN/m^2	kg/cm^2	10.1968

Conversion of Thermometer Scales

- Temperature Fahrenheit (°F) = 9/5 Temperature Celsius + 32
- Temperature Celsius (°C) = 5/9 Temperature Fahrenheit – 32 or (°C × 1.8) + 32 = °F

$$\frac{°F - 32}{1.8} = °C$$

Pressed glass ceramic (IPS empress) 410
Preventive resin restoration
Primary caries 14
Primary flare 288
Primary resistance and retention form 253
Primers 247
Priming 326
PRIMM 353
Principle of EDEC 71
Principle of laser 609
Proarginin technology 561
Procedure scope 624
Procion 132
Production of aerosol 464
Prophylactic odontotomy
Propolis 571
Proportion 484
Proportioning of alloy and mercury 257
Proteolysis chelation theory 34
Proteolytic theory 33
Protrusive functional occlusion 62
Protrusive non-functional occlusion 62
Proximal contact areas 83
Proximal contours 76
Pulpotomy 574
Pulp currettage 571
Pulp protection 224
Pulp vitality tests 98
Pulpal inflammation 224
Pulpal line angle 23
Pulpal pathology 435
Pulpal reaction 576
Pulp-dentin organ 576
Pulp reaction to trauma 586
Pulp reaction to vital bleaching 588
Pumice 453

Quartz 375, 440, 528
Quaternary alloys 212

Radial clearance 154
Radiation caries 32
Radioactive isotopes 445
Radiometer 359
Radiovisiography (RVG) 118
Rake angle 153
Rake face 153
Ramnant water therapy 344
Rampant caries 32
Rapid or immediate separation 184
Rarefaction of bone 88
Recurrent caries 32, 116
Red proportion 485
Reducing flux 299
Reference image 119
Reflection 469
Refraction 470
Refractory materials 297
Reinforced glass ceramic 416
Reinforcement of resin matrix 339
Repair of ceramic restoration 430
Reparative dentin 235
Repair of ceramic restorations 431
Repair of composite 382
Reservoir 296
Residual caries 15
Residual compressive stresses 411
Resin infiltration 448, 549
Resin interdiffusion zone 326
Resin matrix 350
Resin-modified glass-ionomer cements 393
Resin-reinforced layer 319
Resin tags 319
Resistance and retention form 218
Rests 148
Retina 472
Reverse bevel 25
Reverse curve 229
Reverse diffusion method 447
Reverse step 251
Reversible hydrocolloid 290
Reversible pulpitis 556
Role of contact areas 75
Rolled cotton twills 205
Rolling 149
Root caries 14, 31, 54
Rope 238
Rotary instruments 149
Rouge 200
Rubber dam 196
Rubber dam application 201
Rubber dam kit 196
Rubber dam clamps 197
Rubber dam holder 198
Rubber dam punch 198
Rubber dam retainer forceps 198
Rubber dam sheets 196
Rubber dam template/stamp 198
Run-out 155

Safe-T-frame 198
Saliva ejector 180
Salivary reductase test 102
Sandwich restorations 403
Scanning electron microscopy 447
Secondary caries/recurrent caries 15, 56
Secondary dentin 48

Secondary flare 288
Secondary reaction stage 389
Secondary retentive devices 222
Sectional matrix system 186
Self-etch adhesive 334
Self-sealing restoration 438
Semicohesive gold form 269
Semicritical items 163
Senile caries 14
Shade selection 479
Shade taking devices 479
Shank 138, 150
Sharpening of instruments 148
Shear cusps 63
Short bevel 25
Shoulder 25
Silica 407
Silicon carbide (carborundum) 453
Silicophosphate cement dies 292
Silicosis 453
Silorane 355
Silver cermet 392
Silver plating 292
Simple cavities 19
Single beveled instruments 140
Single composition/all in one alloy 245
Single plane instrument 139
Sintering 156
Sjögren's syndrome 507
Skirt 222
Slice preparation 284
Slide in centric 62
Slots or horizontal grooves 308
Slump test 398
Smear layer 225
Smear plugs 324
Smear unit 320
Smile line 488
Smooth surface caries 29, 50
Smooth surface cavities 14, 20
Snyder Test 101
Sof-lex discs 399
Soft tissue lasers 612
Soft-start curing 359
Soft steel 137
Sonotrodes 426
Spatulation time 240
Specificity 265
Spectrophotometer 479
Specular reflection 469
Speed ranges 150
Spheroiding 93
Spinel 414
Spiral angle 153
Spiro-orthocarbonates 355
Spoon excavator 141
Spratley blade carver 461
Spratley burnisher 455
Sprue former attachment 296
Sprue former diameter 295
Sprue former length 295
Sprue former location 295
Sprue former material 294
Sprue former number 296
Sprue former 294
SR Isosit system 376
Stabilizing cord 199
Stabilizing resin–dentin bond 338
Stages of pulp inflammation 579
Stainless steel 138
Stains and color modifiers 407
Stamp cusps 62
Starter gold 273
Static relationship 61
Steam cleaner 461
Steel siqveland self-adjusting matrix 190
Stein's knife 144
Stellite 138
Stem cells 40
Stepping 271
Stereographic tracing 78
Sterilization of cavity 225
Sticky wax 294
Stippling 524
Stock impression trays 290
Stomatognathic system 1,61,72
Stopping stick 236
Strain hardening 267
Strengthening of ceramic 410
Streptococcus mutans 41
Stress concentration 153
Stroboscopic light 377
Subgingival lesions 282
Suborder 139
Subsurface demineralization 59
Subsurface porosity 303
Subtraction radiography 119
Subtractive color theory 474
Superdioxide water 173
Supporting cusps 62
Surface energy 319
Surface finish and texture 86
Surface irregularities 451
Surface layer 50
Surface profilometry 511
Surface protection 399
Surface temperature 601
Surface wetting agent 319
Surgical means 210
Swab test 103
Synthetic smear layer 437
Systemic theory 38

Tactile examination 108
Taper 285
Tarno 138
Teflon 366
Tempering bath137
Terahertz imaging 128
Terminal arc of closure 64
Terminal hinge axis 64
Ternary alloys 245
Tertiary amine 329
Tertiary dentin 521
Thermal conductivity 224
Thermal expansion technique 299
Thermal sensitivity 98
Thermal tests 525
Threaded pins 310
Three increment 240
Throat screens 205
Tiger clamp 198
Tin 246
Tissue coagulants 210
Titanium alloys 281
Tofflemire universal retainer 190
Toilet of the cavity 225
Tongue depressors 208
Tongue guards 208
Tooth discoloration 589
Tooth flexure 346
Tooth fracture 259
Tooth guidance 62
Tooth separators 109
Topical application of fluoride 204
Torque 75
Tracer 448
Trace elements 46
Traction principle 184
Traffic light matrix model 100
Transferable records 77
Transillumination 124
Translucent zone 52
Transluncency 469
Transmission electron microscopy 449
Transparency 469
Transparent crown form matrices
Transparent dentin 48
Trauma from occlusion 86
Trial impression 287
Triple angle chisel 141
Triangular fossae 86
Tricalcium phosphate 538
Triclosan 395
Tricure activation 390
Triple-beveled instruments 140
Tripoli 300
Trituration 257
Tunnel restorations 541
Twist drill 313
Two digit system 13

Ultrashort/partial bevel 25
Ultrasonic cleaner 164
Ultrasonic condensation 259
Ultrasonic excavation 546
Ultrasonic imaging 132
Ultraviolet illumination 125
Under-contoured restorations 98
Undercut concave (UC) 502
Unfilled resin 4
Universal adhesive 335
Universal system 12
UV light 546

Vacuum casting machine 298
Vacuum firing 412
Vacuum investing 298
Value 476
Vasoconstrictors 105
Venting 302
Vertical/angular bone loss 88
Videoscope 132
Vimal Sikri classification 27, 28
Visible luminescent spectroscopy 127
Visio Gem 377
Vision 160
Visual examination 90,108
VITA shade guide 478
Vital tooth bleaching 593
Vitality 98
Vitamins 45
Vitrification 406
V-shaped defect 401

Walking bleaching 599
Wall lesion 58
Washer disinfector 164
Water bath technique 300
Water-driven handpiece 149
Water flux theory 344
Water tree 343
Water treeing phenomenon 343
Wax impressions 90
Wax pattern 285
Wedelstaedt chisel 143
Wedge principle 184
Wedges 184
Wedging 184
Wet bonding 331
Wetting 319
Whipping method 411
Whipmix 70
White light 127
Wide centric 64
Wilson's knife 144
Winged retainers 197
Wing technique 201
Wingless retainers 197
Woodbury design 278
Wooden wedges 184
Woodward's screw matrix 185
Work hardening 267
Working tooth guidance 63
Worm theory 33
Wrought precious metal pins

Xenon lamps 628
Xeroradiography 117
Xerostomia 50,528,532
Xylitol 538

Yitterbium trifluoride 351
Yttrium trifluoride 351
Young's frame 198

Zenith point 488
Zinc oxide eugenol cement 237
Zinc phosphate cement 239
Zirconium dioxide 351
Zirconium silicate 379
Zirconomer 396
Zone of decomposed dentin 54
Zones of enamel caries 50
Zones of dentinal caries 53
Zsigmondy-Palmer notation system 10
